PROFILE

SOC Analyst with hands-on experience in security monitoring, alert triage, threat analysis, and incident investigation. Experienced in developing AI-powered web application security solutions with machine learning–based threat detection and runtime monitoring. Skilled in log analysis, security event investigation, and network monitoring using Wazuh, Splunk, and Wireshark. Passionate about threat detection, incident response, and strengthening organizational security posture.

EDUCATION

2020 – 2022
Mianwali, Pakistan
ICS
Superior College Mianwali

09/2022 – 06/2026
Islamabad, Pakistan
BS Cybersecurity
Air University, Islamabad

SKILLS

- FTK
- Osint
- Snort
- SIEM (Wazuh)
- Wireshark, Metasploit, Nessus, OpenVAS
- OWASP ZAP
- Penetration Testing
- IDS/IPS
- Malware Analysis
- Languages (Python,C++,C,C#,MySQL)
- WordPress
- Networking

EXPERIENCE

08/2026 – Present
DWP Group Head office Lahore
Trainee Soc Analyst
Monitor and analyze security alerts using Wazuh SIEM, performing alert triage, investigation, and incident analysis. Investigate Windows, PowerShell, Sysmon, authentication, endpoint, and firewall events, conduct false-positive analysis and detection tuning, and develop customized Wazuh rules. Document findings and support incident response, containment, and remediation activities.

07/2025 – 09/2025
THINGZEYE
CTI Intern
Contributed to a CTI Tool Development project focused on cyber threat analysis and intelligence automation. Conducted research on brand impersonation and fake social media accounts, analyzed existing detection tools, and supported the development of social media–based threat detection mechanisms to strengthen brand protection capabilities.

07/2024 – 09/2024
CodersCave
Python Development Intern
Gained practical experience in Python development by creating scripts to automate tasks and improve efficiency. Worked with data handling, APIs, debugging, and code optimization to build reliable and functional solutions.

06/2024 – 09/2024 **SOC Analyst Intern**
ITSOLERA PVT LTD Completed a hands-on SOC internship focused on network and endpoint security. Worked on integrating Wazuh with pfSense for traffic monitoring, blocking unauthorized IPs, and strengthening malware detection by integrating VirusTotal with Squid and Wazuh. Also monitored malicious domains, analyzed logs, and worked with File Integrity Monitoring (FIM) and Windows Defender.

PROJECTS

Final Year Project (Safex)
Developed a Dockerized multi-layer Web Application Firewall (WAF) integrating machine learning–based threat detection, runtime monitoring, threat intelligence, and honeypot services to enhance web application security. Implemented detection mechanisms for SQL Injection, Cross-Site Scripting (XSS), Path Traversal, and Command Injection attacks with adaptive rule management and IP reputation filtering. Built a real-time Flask monitoring dashboard featuring live analytics, attacker profiling, threat scoring, and incident timeline visualization. Integrated eBPF-based container runtime monitoring to detect reverse shells, sensitive file access, and unauthorized runtime activity.

Penetration Testing of a Web Application
Performed penetration testing on a web application using tools such as OWASP ZAP, Burp Suite, and Metasploit to identify and exploit security vulnerabilities. Analyzed the impact of identified weaknesses, documented exploitation results, and mapped findings to CVSS risk levels to assess severity and recommend appropriate mitigation measures.

HONOUR AND AWARDS

- Certificate for Conducting Career Counseling Sessions In TCF Schools.
- SOFTEC'25 Cyber Security competition
- Course Done "The Complete Cyber Security Course: Hackers Exposed"
- Scavenger Hunt Participation
- Certificate for attending an enlightening webinar hosted by CyberWarfare Labs.
- Course : Cyber Security Analyst [C3SA] by CyberWarfare Labs

VOLUNTEER ENGAGEMENT

Islamabad, Pakistan **Team Lead**
Events Management
Air University Cyber Security Society

Mianwali, Pakistan **Ambassador**
- The Citizen Foundation
